

MANAGED FIREWALL SERVICES

Overview

The Firewall and Network Security Services provided by CTResources is a full-service solution that maintains edge network protection for any small to mid-size organization. With the deployment of an on-premises Next-Generation Firewall, the organization's network will be protected from outside threats that can compromise critical assets and disrupt business continuity. This Next-Generation Firewall scans incoming and outgoing network traffic for Malware and other suspicious activity, stopping attackers in their tracks.

Included with this service is remote management and monitoring of the Firewall by CTResources. Threats discovered will be identified and mitigated should they occur. Reporting and VPN configuration is also available upon request. Optional Wi-Fi management and access available for an additional cost.

Services Included

The Firewall and Network Security Services include the following:

- On-site Edge Firewall Lease
- New Installation Setup
- Remote Configuration Management
- Remote Monitoring of Threats and Security Events
- Intrusion Prevention and DDoS Protection
- Web Protection
